CONTENTS FOR VOLUME 9, 1977

U.S. IBP Tundra Biome Research

Soil and Landform Associations, Prudhoe Bay Area, Alaska
K. R. EVERETT AND R. J. PARKINSON 1-19

Papers

Reconstruction of the Morphology, Dynamics, and Thermal Characteristics of the Laurentide Ice Sheet at its Maximum
D. E. SUGDEN 21-47

Estimation of Recent Climatic Change in Irian Jaya by Numerical Modeling of Its Tropical Glaciers
IAN ALLISON AND PHILLIP KRUSS 49-60

Arctic Sea-ice Conditions in Early Spring Viewed by Satellite
K. AHLNÄS AND G. WENDLER 61-72

Pollen Separation of Three North American Birches
JOHN W. IVES 73-80

Information 81-82

Book Reviews 83-84

U.S. IBP Paper

Validation of a Model of the Effect of Tundra Vegetation on Soil Temperatures
EDWARD NG AND PHILIP C. MILLER 89-104

U.S. IBP Belowground Ecosystem Symposium: Contributions from the Tundra Biome

Belowground Tundra Research: A Commentary
P. J. WEBBER 105-111

Distribution Patterns of Belowground Standing Crop in Arctic Tundra at Barrow, Alaska
JOHN G. DENNIS 113-127

Root Growth, Respiration, and Carbon Dioxide Evolution in an Arctic Tundra Soil
W. D. BILLINGS, K. M. PETERSON, G. R. SHAVER, AND A. W. TRENT 129-137

Temperature Compensation in Phosphate Absorption Occurring over Diverse Time Scales
F. STUART CHAPIN III 139-148

The Distribution of Fungal Hyphae in Arctic Soil on the International Biological Programme Tundra Biome Site, Barrow, Alaska
GARY A. LAURSEN AND ORSON K. MILLER, JR. 149-156

The Distribution and Magnitude of Belowground Plant Structures in the Alpine Tundra of Niwot Ridge, Colorado
P. J. WEBBER AND DIANE EBERT MAY 157-174

Papers

Measurements of the Temperature, Wind, and Moisture Distribution across the Northern Coast of Alaska
JOHN E. WALSH 175-182

Evolution of Glaciated Topography of Upper Skagit Drainage Basin, Washington
RICHARD B. WAITT, JR. 183-192

Environmental Change and Cultural Change in the Eastern Canadian Arctic during the Last 5000 Years
R. G. BARRY, WENDY H. ARUNDALE, J. T. ANDREWS, RAYMOND S. BRADLEY, AND HARVEY NICHOLS 193-210

Pollination of *Thlaspi alpestre* by Selfing and by Insects in the Alpine Zone of Colorado
BRUCE PETERSEN 211-215

U.S. IBP Paper

Distribution, Abundance, and Biomass of Colorado Alpine Tundra Arthropods
WAYNE W. TOLBERT, VIRGINIA R. TOLBERT, AND RICHARD E. AMBROSE 221-234

Papers

The "Lappish Movement" and "Lappish Affairs" in Finland and Their Relations to Nordic and International Ethnic Politics
LUDGER MÜLLER-WILLE 235-247

Japanese Timberlines and Some Geographic Comparisons
P. WARDLE 249-258

Genetic Differentiation among Growth Forms of Engelmann Spruce and Subalpine Fir at Tree Line
MICHAEL C. GRANT AND JEFFRY B. MITTON 259-263

Holocene Pollen Diagrams from Subarctic Labrador-Ungava: Vegetational History and Climatic Change
SUSAN K. SHORT AND HARVEY NICHOLS 265-290

Little Ice Age Snow-Cover Extent and Paleoglaciation Thresholds: North-central Baffin Island, N.W.T., Canada
CHARLENE WRIGHT LOCKE AND WILLIAM W. LOCKE III 291-300

A Note on the Effect of a Glacier on the Summer Thermal Climate of an Ice-marginal Area
W. F. RANNIE 301-304

Geobotanical and Ecological Observations at Two Locations in the West-central Siberian Arctic
P. J. WEBBER AND D. R. KLEIN 305-315

Book Reviews 317-323

Information 324

U.S. IBP Paper

Carbonic Acid Leaching in a Tropical, Temperate, Subalpine, and Northern Forest Soil
D. W. JOHNSON, D. W. COLE, S. P. GESSEL, M. J. SINGER, AND R. V. MINDEN 329-343

Papers

Postglacial History of Lost Trail Pass Bog, Bitterroot Mountains, Montana
PETER J. MEHRINGER, JR., STEPHEN F. ARNO, AND KENNETH L. PETERSEN 345-368

Population Dynamics in Two Subpopulations of Reindeer in Svalbard
EIGIL REIMERS 369-381

Soil Differences within Spruce-fir Forested and Century-old Burned Areas of Libby Flats, Medicine Bow Range, Wyoming

RICHARD G. REIDER AND PETER J. UHL 383-392

Recent Tree Invasion of Subalpine Meadows in the Wind River Mountains, Wyoming
PETER W. DUNWIDDIE 393-399

Comparative Aspects of Growth and Reproductive Biology in Arctic and Alpine Populations of *Saxifraga cernua* L.
RICHARD R. WEHRMEISTER AND ERIK K. BONDE 401-406

The Influence of Light Intensity and Temperature on the Field Carbon Dioxide Exchange of *Dicranum fuscescens* in the Subarctic
PETER R. HICKLENTON AND WALTER C. OECHEL 407-419

Deglaciation and Marine Paleoclimates, Schuchert Dal, Scoresby Sund, East Greenland
F. ALAYNE STREET 421-426

Correspondence

On a Possible Sea-Breeze Circulation near Barrow, Alaska
RICHARD E. MORITZ 427-431

Book Review 432

Index for Volume 9 433-440

SUBJECT AND AUTHOR INDEX FOR VOLUME 9, 1977

A:B biomass ratios, 157-174
Abies: in Colorado, 259-263; in Japan, 249-258
Aboveground vascular productivity, 157-174
Alaska: belowground plant standing crop, 113-127; climate measurements, 175-182; *soils at Prudhoe Bay,* 1-19; soil fungal hyphae, 149-156
Allison, I. and Kruss, P. (Estimation of recent climatic change in Irian Jaya by numerical modeling of its tropical glaciers), 49-60
Alpine Ecology Center, Aletsch, Switzerland, 81-82
Alpine: arthropods, 221-234; timberline, 249-258; tree line, 259-263; tundra belowground plant structures, 157-174; tundra soils, 383-392
Ambrose, R.E. *See* Tolbert, W.W., *et al.*
Andrews, J.T. *See* Barry, R.G., *et al.*
Archaeology, arctic, 193-210
Arctic: archaeology, 193-210; climate change, 193-210; climate measurements, 175-182; fungal hyphae in soils, 149-156; microclimate, 301-304; paleoglaciation, 291-300; root growth, 129-137; sea breezes, 175-182, 427-431; sea ice, 61-72; Siberian geobotany, 305-315; soil temperatures, 89-104
Arno, S.F. *See* Mehringer, P.J., Jr. *et al.*
Arthropods, tundra: distribution, biomass energetics, 221-234
Arundale, W.H. *See* Barry, R.G., *et al.*
Association of Canadian Universities for Northern Studies, 324

Baffin Island: microclimate, 301-304; paleoglaciation thresholds, 291-300
Barry, R.G., Arundale, W.H., Andrews, J.T., Bradley, R.S., and Nichols, H. (Environmental change and cultural change in the eastern Canadian Arctic during the last 5000 years), 193-210
Basal thermal temperatures of Laurentide ice sheet, 21-47
Belowground tundra research: carbon dioxide evolution in soil, 129-137; commentary, 105-111; fungal hyphae, 149-156; plant structures, 157-174; respiration, 129-137; root growth, 129-137; standing crops, 113-127; temperature compensation in phosphate absorption, 139-148
Betula, in Japan, 249-258; pollen separation, 73-80
Billings, W.D., Peterson, K.M., Shaver, G.R., and Trent, A.W. (Root growth, respiration, and carbon dioxide evolution in an arctic tundra soil), 129-137
Book Reviews
A Bibliography of the Literature on North American Climates of the Past 13,000 Years. D.K. Grayson. *M. Andrews,* 83-84
Avalanche Handbook. R.I. Perla and M. Martinelli, Jr. *J. Major,* 318-320
Geomorphology and Engineering. D.R. Coates (ed.). *E.E. Wahlstrom,* 432
Ice Core Drilling: Proceedings of a Symposium. J.F. Splettstoeser (ed.), *R. Koerner,* 318
International Cloud Atlas, Vol. I: Manual on the Observation of Clouds and Other Meteors, WMO. *R.G. Barry,* 323
Studien zur Jungquartären Glazialmorphologie mexikanischer Vulkane. K. Heine. *S. Hastenrath,* 83
The Climate of Mt. Wilhelm. R.J. Hnatiuk, J.M.B. Smith, and D.N. McVean. *D. Greenland,* 321-322
The Equatorial Glaciers of New Guinea. G.S. Hope, J.A. Peterson, I. Allison, and U. Radok (eds.). *D. Greenland,* 322-323
The Periglacial Environment. H.M. French. *R.G. Reger,* 321
Whaling and Eskimos: Hudson Bay 1860-1915. W.G. Ross. *R.M. McGhee,* 317-318
Boundary layer, arctic, 175-182
Bradley, R.S. *See* Barry, R.G., *et al.*
Bulbils, 401-406

Carabidae, 223-234
Carbon in soil, 149-156
Carbon dioxide: in solid, 129-137, 329-343; exchange in moss, 407-419
Carbonic acid leaching, 329-343
Chapin, F.S., III (Temperature compensation in phosphate absorption occurring over diverse time scales), 139-148
Chromosomes, *Saxifraga,* 401-406
Climate change: Arctic, 193-210; Irian Jaya, 49-60; Labrador-Ungava, 265-290
Cole, D.W. *See* Johnson, D.W., *et al.*
Collembola, 223-234
Colorado: alpine belowground plant structures, 157-174; pollination in alpine zone, 211-215; tree line, 259-263; tundra arthropods, 221-234
Cordilleran ice sheet, 183-192
Correspondence, 427-431
Cultural change in Arctic, 193-210

Decomposition, 149-156
Deglaciation, 421-426
Dendrochronology, 393-399
Dennis, G. (Distribution patterns of belowground standing crop in arctic tundra at Barrow, Alaska), 113-127
Dicranum, photosynthesis, 407-419
Dunwiddie, P.W. (Recent tree invasion of Subalpine meadows in the Wind River Mountains, Wyoming), 393-399

Ethnic politics, 235-247
Environmental change in Arctic, 193-210
Everett, K.R. and Parkinson, R.J. (Soil and landform associations, Prudhoe Bay area, Alaska), 1-19

Fertilization response, 113-127
Finland, Lappish politics, 235-247
Fungal biomass in arctic soils, 149-156

Gene flow, 259-263
Genetic differentiation at tree line, 259-263
Geomorphology, Washington State, 182-192
Gessel, S.P. *See* Johnson, D.W., *et al.*
Glacial geology, Washington State, 182-192
Glacier: cooling, 301-304; modeling, 49-60
Grant, M.C. and Mitton, J.B. (Genetic differentiation among growth forms of Engelmann spruce and subalpine fir at tree line), 259-263
Grazing, 393-399
Greenland, deglaciation, 421-426

Hicklenton, P.R. and Oechel, W.C. (The influence of light intensity and temperature on the field carbon dioxide exchange of *Dicranum fuscescens* in the Subarctic), 407-419
Holocene pollen diagrams, 265-290

Ice margin, temperatures, 301-304
Ice sheet: Cordilleran, 183-192; Laurentide, 21-47
Insects, pollination by, 211-215
International Biological Programme, 1-19, 89-104, 113-127, 129-137, 139-148, 149-156, 157-174, 221-234, 329-343
Irian Jaya, climate change, 49-60
Ives, J.W. (Pollen separation of three North American birches), 73-80

Japan, timberline, 249-258
Johnson, D.W., Cole, D.W., Gessel, S.P., Singer, M.J., and Minden, R.V. (Carbonic acid leaching in a tropical, temperate, subalpine, and northern forest soil), 329-343

Katabatic winds, 301-304
Klein, D.R. *See* Webber, P.J. and Klein, D.R.
Kruss, P. *See* Allison, I. and Kruss, P.

Labrador-Ungava, vegetation and climatic history, 265-290
Land-sea contrasts, arctic, 175-182
Landforms, Prudhoe Bay area, 1-19
Lapps, politics, 235-247
Laurentide ice sheet, reconstruction of, 21-47
Laursen, G.A. and Miller, O.K., Jr. (The distribution of fungal hyphae in arctic soil on the International Biological Programme Tundra Biome Site, Barrow, Alaska), 149-156

Lichen-free areas, 291-300
Light intensity, influence on CO_2 exchange, 407-419
Little Ice Age, 291-300
Locke, C.W. and Locke, W.W., III (Little Ice Age snow-cover extent and paleoglaciation thresholds: north-central Baffin Island, N.W.T., Canada), 291-300
Locke, W.W., III. *See* Locke, C.W. and Locke, W.W., III

May, D.E. *See* Webber, P.J. and May, D.E.
Mehringer, P.J., Jr., Arno, S.F., and Peterson, K.L. (Postglacial history of a Lost Trail Bog, Bitterroot Mountains, Montana), 345-368
Microclimate, ice-marginal area, 301-304
Miller, O.K., Jr. *See* Laursen, G.A. and Miller, O.K., Jr.
Miller, P.C. *See* Ng, E. and Miller, P.C.
Minden, R.V. *See* Johnson, D.W., *et al.*
Mites, 223-234
Mitton, J.B. *See* Grant, M.C.
Modeling: glacier, 49-60; ice sheet, 21-47; soil temperatures, 89-104; temperature compensation, 146-147
Montana, Bitterroot Mountains, pollen analysis, 345-368
Moritz, R.E. (Correspondence: On a possible seabreeze circulation near Barrow, Alaska), 427-431
Müller-Wille, L. (The "Lappish Movement" and "Lappish Affairs" in Finland and their relationships to Nordic and international ethnic politics), 235-247
Mycelium, 149-156

Ng, E. and Miller, P.C. (Validation of a model of the effect of tundra vegetation on soil temperatures), 89-104
Nichols, H. *See* Barry, R.G., *et al. and* Short, S.K. and Nichols, H.
Nitrogen, soil, 149-156

Oechel, W.C. *See* Hicklenton, P.R. and Oechel, W.C.
Organic acid, 331
Ovis nivicola, 307

Paleoclimate: Greenland, 421-426; Irian Jaya, 49-60; Labrador-Ungava, 256-290; Montana, 345-368
Paleoecology: Labrador-Ungava, 256-290; Montana, 345-368
Paleoglaciation thresholds, 291-300
Parkinson, R.J. *See* Everett, K.R. and Parkinson, R.J.
Petersen, B. (Pollination of *Thlaspi alpestre* by selfing and by insects in the alpine zone of Colo-

rado), 211-215
Petersen, K.L. *See* Mehringer, P.J., Jr. *et al.*
Peterson, K.M. *See* Billings, W.D., *et al.*
Photoperiodism, 401-406
Photosynthesis, 407-419
Picea, in Colorado, 259-263
Pinus, in Japan, 249-258
Plant communities, Siberian Arctic, 308-309; 312-313
Plant production, 113-127
Plant succession, 393-399
Pollen analysis: Labrador-Ungava, 265-290; Montana, 345-368
Pollen: grain size, 73-80; separation, 73-80
Pollination, 211-215
Population dynamics of reindeer, 369-381
Postglacial chronology, 345-368
Primary productivity, 105-110, 113-127
Prudhoe Bay, soils, 1-19
Pura River, geobotany, 310-314
Putorana Plateau, geobotany, 305-310

Quaternary glacial geology, 183-192

Rangifer, 307, 311, 312, 369-381
Rannie, W.F. (A note on the effect of a glacier on the summer thermal climate of an ice-marginal area), 301-304
Reider, R.G. and Uhl, P.J. (Soil differences within spruce-fir forested and century-old burned areas of Libby Flats, Medicine Bow Range, Wyoming), 383-392
Reimers, E. (Population dynamics of two subpopulations of reindeer in Svalbard), 369-381
Reproductive biology, *Saxifraga*, 401-406
Respiration, roots, 129-137
Rhizomes, 113-127
Rhododendron, in Japan, 249-258
Roots: growth, 113-127, 129-137; phosphate absorption, 139-148; respiration, 129-137

Satellite imagery, 61-72
Saxifraga cernua, 401-406
Scandinavia, Lappish politics, 235-247
Sea breezes, arctic, 175-182, 427-431
Sea Ice, 61-72
Shaver, G.R. *See* Billings, W.D., *et al.*
Short, S.K. and Nichols, H.C. (Holocene pollen diagrams from subarctic Labrador-Ungava: Vegetational history and climatic change), 265-290
Siberia, geobotany, 305-315
Simulation, ice sheet, 21-47
Singer, M.J. *See* Johnson, D.W., *et al.*
Snow cover, Little Ice Age, 291-300
Soils: forest, 329-343, 383-392; invertebrates in, 221-234; meadow, 383-392; Prudhoe Bay, 1-19; rate of formation, 383-392; respiration, 129-137; temperate, 329-343; temperatures, 89-104; subalpine, 329-343
Spiders, 223-234
Spruce-fir forests, 383-392
Street, F.A. (Deglaciation and marine paleoclimates, Schuchert Dal, Scoresby Sund, East Greenland), 421-426
Subalpine meadows, 393-399
Subarctic, moss, 407-419
Sugden, D.E. (Reconstruction of the morphology, dynamics and thermal characteristics of the Laurentide ice sheet at its maximum), 21-47
Svalbard, reindeer, 369-381

Taimyr Peninsula, geobotany, 310-314
Temperature: adaptation, 139-148; for root growth, 129-137; ice-marginal area, 301-304; influence on CO_2 exchange, 407-419; soil, 89-104
Thaw-lake cycle, 14-19
Thlaspi alpestre, 211-215
Timberline, 249-258. *See also* tree line
Tolbert, V.R. *See* Tolbert, W.W., *et al.*
Tolbert, W.W., Tolbert, V.R., and Ambrose, R.E. (Distribution, abundance and biomass of Colorado alpine tundra arthropods), 221-234
Tree line, 259-263
Trent, A.W. *See* Billings, W.D., *et al.*
Tropical glaciers, 49-60
Tundra: acclimation of plants, 139-148; arthropods, 221-234; belowground plant production, 113-127, 157-174; climate measurements, 175-182; fungal hyphae in soil, 149-156; root growth, 129-137; soils, 1-19, 89-104

Uhl, P.J. *See* Reider, R.G.
US/USSR agreement on environmental protection, 305-315

Vegetation history: Labrador-Ungava, 265-290; Montana, 345-368
Vegetation ordination, 157-174

Waitt, R.B., Jr. (Evolution of glaciated topography of Upper Skagit drainage basin, Washington), 183-192
Walsh, J.E. (Measurement of the temperature, wind, and moisture distribution across the northern coast of Alaska), 175-182
Wardle, P. (Japanese timberlines and some geographic comparisons), 249-258
Washington State, glacial geology, 183-192
Webber, P.J. (Belowground tundra research: a commentary), 105-111
